

Doug Myers'

Strategies For Unlimited Traffic

In this report, I'm going to share with you killer traffic strategies for attracting thousands of visitors to your website each and every week. They include:

1. High-Profile Article Marketing
2. Forum Marketing
3. Ebook Syndication
4. Video Marketing
5. Viral Pushes
6. Ad Swaps
7. Paid Advertising

These are the exact strategies I have used to build a mailing list of over 7,000 subscribers. So without further ado, let's dive into the details...

1. High-Profile Article Marketing

As you probably know, article marketing is one of the best ways to drive highly-targeted traffic to your website. However, if you re-focus your efforts towards high-profile article marketing can generate 10x as much traffic.

Instead of submitting your articles to article directories, you submit them to the top websites and blogs in your market.

So, for example, if you have a blog about sports, you could submit your articles to

<http://bleacherreport.com/>

, one of the most popular sports websites online. If you have a website about weddings, you could submit articles to

<http://www.favorideas.com/submit-wedding-articles/>

If you have a website about parenting, you could submit articles to

<http://www.momsnetwork.com/submit-articles.shtml>

If you have a website about finance, you could submit articles to

<http://www.istockanalyst.com/article/submitarticle.html>

Are you starting to get the idea here? No matter what market you're in, there are very popular websites

that you could be submitting articles to for massive traffic.

Here's a list of very popular websites that I personally submit articles to. The list below is a gold mine

for building a list of thousands of subscribers. If you published just ONE really good article every day

to the following websites, and had a good call to action in your resource box that sent people to your

squeeze page, then you would have a highly responsive list of AT LEAST 1,000 subscribers by the end

of the month.

(This site ranks #2

for "make money online" and they are looking for guest bloggers!

(Submit your articles in the Marketing or SEO sections. This site will send traffic directly to your blog or website. So you will need to have a website set up to submit your articles

here. But they can drive hundreds of visitors to your site.)

2. Forum Marketing

Forum marketing is another excellent strategy for building a list of subscribers and sending tons of traffic to your website.

Forum marketing is a highly underrated, but extremely effective strategy for building a list of subscribers, driving highly-targeted traffic, and establishing yourself as an authority in your particular market.

Forums put you directly in front of your target market, making it a goldmine for driving thousands of highly targeted visitors to your website.

But keep in mind here that the key to successful forum marketing is to become an active participant in the community. Your first priority is to deliver lots of value. And that means posting highly valuable content in the forums and helping people with their questions.

Once you've become a trusted member and delivered some great value in your posts, people will naturally want to learn more about what you have to offer.

This is where your signature link comes in...

You'll want to use your signature link to send people to your squeeze page where you can build your list of subscribers.

Here's an example of a good signature line:

"Find out how to get front-page Google Rankings in 24 hours with my FREE Google Domination

Video series ... <http://www.yoursqueezepagehere.com> "

The key here is to entice them with some sort of benefit to get them to come to your website. Keep your signature file short and to the point. You should only be promoting one page in your signature file.

Don't confuse people with multiple options.

Also keep in mind that it's the value of your post that drives people to look at your signature. If you provide people with extraordinary value, then they will naturally want to check out more of your content.

So focus on providing value. One extremely valuable post is worth 10x more than 20 average posts.

You can also use the Warrior Forum to quickly build a large list of subscribers by posting free WSO's.

<http://www.warriorforum.com/warrior-special-offers-forum/>

You can also build your list by posting free offers on the Digital Point Forums as well (in the Buy, Sell, and Trade section.)

<http://forums.digitalpoint.com/forumdisplay.php?f=24>

Another great place to post your offer and build your list is

<http://marketplace.sitepoint.com>

You can create free reports to give away on these forums simply by combining a collection of your article into a free PDF report. By re-purposing your articles, you will be able to generate even more traffic and subscribers.

*** Always be looking for ways to re-purpose your content. There are a TON of ways to get extra mileage out of any type of content you create online.

3. Ebook Syndication

Speaking of re-purposing your content, another excellent way to re-use your content is to combine your

articles into an ebook and submit them to all of the top Ebook directories. This is an extremely powerful technique that very few marketers are taking advantage of.

Simply combine your articles into a PDF ebook, which you can do with a free piece of software called

NitroPDF - <http://www.nitropdf.com/index.asp>

Here's a list of the most popular ebook directories where you can submit your free ebooks...

Free Ebooks <http://www.free-ebooks.net/>

Jogena <http://www.jogena.com/ebookdir/ebookform.htm>

ebook2u <http://www.ebook2u.com/>

GetFreeEbooks <http://www.getfreebooks.com/>

EbookMall <http://ebookmall.com>

Scribd <http://scribd.com/>

DocStoc <http://www.docstoc.com/>

Published.com <http://www.published.com/>

Ebook Tags <http://www.ebooktags.com/>

Ideamarketers <http://www.ideamarketers.com/>

EbookJungle <http://www.ebookjungle.com/>

Ebook Directory <http://www.ebookdirectory.com/>

KnowFree <http://knowfree.net/>

E-Books Directory <http://www.ebooksdirectory.com/>

MyBook <http://my-book.co.cc/>

In order to collect subscribers from your ebook, be sure to put an ad at the top of the ebook that points

them to your squeeze page. You can also use a

PDF PopUp - <http://www.pdfpup.com/>

to collect subscribers.

Syndicating your ebook -

<http://shylockblogging.com/how-to-pdf-link-building-0907>

is an excellent strategy for building your list, increasing your traffic, and building links to your site.

4. Video Marketing

Video marketing is one of the best ways to tap into the massive amount of traffic on sites like YouTube, Vidder, Veoh, and Google Video.

Create 3-5 minute videos that you can post to all of the top video submission sites.

Use

<http://www.tubemogul.com>

to automate your video submissions.

Send people from your video to your squeeze page. You'll be surprised at just how powerful this technique can be.

Quick Tip

: Create 2-part videos to increase click-through rate.

5. Viral Pushes

Once you have built an audience for your website and a list of subscribers, it's now time to leverage

that existing audience with some viral pushes.

This is where you do some extra promotion for the best articles on your blog.

For this technique to

work properly, you must be promoting a killer article that over-delivers on value.

Once you have a top-notch article, now it's time to create a viral push!

You can do this in a number of different ways. One of my favorite strategies is to use

StumbleUpon

Ads - <http://www.stumbleupon.com/ads/>

StumbleUpon allows you to put your content in front of your target audience for just 5 cents a click.

Once people start coming to your site, they will give it a thumbs-up or a thumbs-down. By paying for

this initial base of visitors, you can easily start a viral campaign that will

spread throughout

StumbleUpon and onto many of the other popular social sites online.

Buying StumbleUpon ads is an excellent way to give your content the push it needs to get over that tipping point.

Another excellent strategy for giving your content a viral push is to ask your subscribers to tweet your article. Simply by asking your subscribers to do something specific, you will get a much higher response rate.

You can also allow your readers to automatically tweet your post using [Tweet Meme](http://tweetmeme.com/static.php?page=button) - <http://tweetmeme.com/static.php?page=button>

Create at least one viral push every week and watch your traffic soar!

6. Ad Swaps

Once you've built a list of 1,000 subscribers, start using ad swaps to grow your list exponentially.

This is an extremely valuable technique that can add hundreds of subscribers to your list at a time.

Here are some places online where you can find other list owners who are looking to do ad swaps:

7. Paid Advertising Options

Paid advertising is another excellent option AFTER you have optimized your sales process. Here are some of the top paid advertising options for those in the Internet Marketing field...
